# Booth & Stage Plot

## DJ EQUIPMENT (PROVIDED BY PROMOTER)

- **3× Pioneer DJ CDJ-3000 or AlphaTheta CDJ-3000X** — linked via a network switch (Pro DJ Link), all on the same, latest firmware.
- **1× 4-channel club mixer** — preferred Pioneer DJM-A9; DJM-V10 or DJM-900NXS2 also fine.
- Each player connected to the mixer (digital coax preferred, RCA as backup). All units stable, in full working order.
- Donn plays from his own USB sticks (rekordbox). No laptop, no extra gear needed.

## BOOTH

- Stable, vibration-free table, approx. 90–110 cm high, min. 2 m wide.
- Dimmable booth light — enough to read screens, not on the DJ.
- 2 free power sockets, a spare LAN cable, and a fan in summer / hot rooms.
- Clear performance zone; space behind the booth for a bag. No drinks on the equipment.
- Booth ready and line-checked 30 min before set time.

## STAGE PLOT — TOP VIEW

TECHNICAL RIDER · 2027

# Channel List

| CH | SOURCE | CONNECTION | DESTINATION | NOTE |
|---|---|---|---|---|
| 1 | **CDJ-3000 · Player 1** | Digital coax (+ RCA) | Mixer CH 1 | USB, Pro DJ Link |
| 2 | **CDJ-3000 · Player 2** | Digital coax (+ RCA) | Mixer CH 2 | USB, Pro DJ Link |
| 3 | **CDJ-3000 · Player 3** | Digital coax (+ RCA) | Mixer CH 3 | USB, Pro DJ Link |
| 4 | **— spare —** | — | Mixer CH 4 | Keep free / B2B guest |
| M | **Mixer MASTER L/R** | XLR balanced | FOH / house PA | Line level, gain set at FOH |
| B | **Mixer BOOTH L/R** | TRS jack | DJ booth monitors | Volume from mixer |
| R | **Mixer REC OUT** | RCA | Recorder (if available) | Must work — sets get filmed |
| MIC | **Vocal mic (optional)** | XLR | Mixer MIC input | Only if host / MC is booked |

MONITOR REQUIREMENTS

## Hear the room, not the room delay

- **2× active full-range booth monitors** (with sub where possible), left and right of the DJ, at head height and aimed at the DJ. No floor wedges as the only monitor.
- Fed from the mixer **BOOTH OUT** on their own send, so Donn controls the level himself.
- Clean and loud enough to mix over the dancefloor without distortion. Professional brands preferred (e.g. L-Acoustics, d&b, Funktion-One, Pioneer XPRS, RCF).
- House sound engineer available at line check and reachable during the set.

**FLEXIBLE BY DESIGN**

Can't provide exactly this? Tell us before signing. Donn plays USB on any current Pioneer / AlphaTheta set-up — we'll agree an alternative in writing rather than cancel. Contact: mgmt@donnstone.com
